INDEX TO VOLUME XIV

The asterisk (*) preceding the page number indicates an original article in this Journal. The letter T preceding the page number indicates a paper reported in the Transactions of the American Association of Neuropathologists. The letter D preceding the page number indicates a discussion of an original article or some other item published in this Journal. Subject entries are made for all articles. Author entries are made for original articles and Society Transactions.

ADAMKIEWICZ, L. L., see Ravens, J. R., *142
Adaptable head holder for experimental cranial surgery, *326
Adenosinetriphosphate in nervous system anoxia, the effect of, *387
Akert, Konrad, see Andy, Orlando J., *198
American association of neuropathologists, annual meeting, Atlantic City, N. J., T108
Anatomophysiologic, experimental, approach to the study of diseases of the basal ganglia, *115
Andy, Orlando J., and Konrad, Akert, seizure patterns induced by electrical stimulation of hippocampal formation in the cat, *198
Angle tumors, experimental cerebellopontine, with angiographic study, *438
Anomalies, developmental, of the horns of the lateral ventricles, *316
Anoxia, the effect of adenosinetriphosphate, in nervous system, *387
Application of the field theory to gliomata, *369
Aronson, Stanley M., Gregory Schwartzman, and Constantin V. Teodoru, lipotropism in poliomyelitis, T109
Arteriosclerotic occlusion of cerebral arteries, importance of endothelial and fibroblastic cell proliferation, in, *348
Ataxia, progressive familial. clinical study of two brothers with one autopsy, *398
Atresia of the foramen of Magendie, congenital hydrocephalus due to, *244

BARLOW, Charles F., a clinico-pathologic report of an acute familial encephalopathy in the newborn infant, *413
Basal ganglia, the experimental anatomophysiologic approach to the study of diseases, of the, *115
Bates, John I., and Martin G. Netsky, developmental anomalies of the horns of the lateral ventricles, *316
Bell, George E., see Towbin, Abe, *263
Benda, Clemens E., the role of neuropathology in modern anthropology. an introduction to the symposium on new techniques, *1
Bertrand, Ivan, and Jean Gruner, the status verrucosus of the cerebral cortex, *331
Birth injury of the caudate nucleus, transventricular adhesions in association with, *84
Blinn, Kenneth A., see Kaufman, Albert A., *387
Bogdanove, Lasca H., see Clark, George, *433
Bogumill, George P., and Paul H. Settlage, a method of replacing portions of the calvarium with transparent plastic, *305
Book reviews, 329, 330, 450
Brain arteries, compression of, as pathogenetic factor for tissue necroses and their areas of predilection, *223
, cytology and cellular pathology of the oligodendrogliomas of the, *142
, progressive muscular dystrophy with extensive demyelination of the, *376
Browne, Kenneth M., Wilbert A. Warner, and A. Earl Walker, cerebral arterial shunt in the monkey, T108
Brownson, Robert H., perineuronal satellite cells in the motor cortex of aging brains, *424
Bruetsch, Walter L., the importance of endothelial and fibroblastic cell proliferation in arteriosclerotic occlusion of cerebral arteries, *348

CALVARIUM, a method of replacing portions of the, with transparent plastic, *305
Carpenter, Malcolm B., see Mettler, Fred A., *92
Carrea, Raul M., see Mettler, Fred A., *92
Case of symmetrical muscular contracture due to sarcoidosis, *313
Central nervous system, cholinesterases of the, *23
, histoplasmosis of the. a case report of histoplasma meningitis, *288
, oxidases and peroxidases, of the, *47
Cerebellopontine, experimental angle tumors with angiographic study, *438
Cerebral arterial shunt in the monkey, T108
Cholinesterases of the central nervous system, *23
Chorioid plexus, stereotaxic displacement of portions, of the, in the rhesus monkey, *92
Choroid plexus papillomas associated with hydrocephalus, *442

Clark, George, and Lasca H. Bogdanove, the induction of the lesions of allergic meningoencephalomyelitis in a predetermined location, *433
Clinico-pathologic report of an acute familial encephalopathy in the newborn infant, *413
Cogan, David G., and Toichiro Kuwabara, fat formation and foam cells following injection of brain tissue into the cornea, *95
Cohen, Maynard M., quantitation of phosphorus compounds in the normal and pathologic human brain, *70
Cohn, Robert, see Neumann, Meta A., *398
Compression of brain arteries as pathogenetic factor for tissue necroses and their areas of predilection, *223
of the spinal cord by extramedullary neoplasms, *276
Congenital hydrocephalus due to atresia of the foramen of Magendie, *244
Cooper, Irving S., see Stellar, Stanley, *438
Cornea, fat formation and foam cells following injection of brain tissue into the, *95
Cortex, cerebral, status verrucosus of the, *331
, motor, of aging brains, perineuronal satellite cells in the, *424
Cranial surgery, adaptable head holder for experimental, *326
Cytology and cellular pathology of the oligodendrogliomas of the brain, *142

DEMYELINATION, extensive, of the brain, with progressive muscular dystrophy, *376
Denny-Brown, D., D111
Developmental anomalies of the horns of the lateral ventricles, *316
Dissemination, spontaneous arachnoidal, of spongioblastoma multiforma, *263
Dynamic neuropathology, *28
Dystrophy, progressive muscular, with extensive demyelination of the brain, *376

EFFECT of adenosinetriphosphate in nervous system anoxia, *387
Electrical stimulation, seizure patterns of hippocampal formation in the cat, induced by, *198
Encephalopathy, acute familial, in the newborn infant. a clinico-pathologic report of an, *413
Endothelial and fibroblastic cell proliferation in arteriosclerotic occlusion of cerebral arteries, importance of, *348
Experimental anatomophysiologic approach to the study of diseases of the basal ganglia, *115
cerebellopontine angle tumors with angiographic study, *438

FEIGIN, Irwin, and Abner Wolf, the phosphatases of the nervous system, *11
Foam Cells and fat formation following injection of brain tissue into the cornea, *95
Foley, Joseph M., D111

GELFAN, S., see Tarlov, I. M., T108
Gibson, James B., congenital hydrocephalus due to atresia of the foramen of Magendie, *244
Gliomata, application of the field theory, to *369
Gore, Ira, see Lichtenstein, Ben W., T110
Groff, R., see Ravens, J. R., *142
Gruner, Jean, see Bertrand, Ivan, *331

HARRINGTON, Eileen S., and Joseph F. Kell, Jr., intraspinal teratoma, with report of a case, *214
Head holder, adaptable, for experimental cranial surgery, *326
Histoplasmosis of the central nervous system. a case report of histoplasma meningitis, *288
Hydrocephalus associated with choroid plexus papillomas, *442
, congenital, due to atresia of the foramen of Magendie, *244

IMPORTANCE of endothelial and fibroblastic cell proliferation in arteriosclerotic occlusion of cerebral arteries, *348
Induction of the lesions of allergic meningoencephalomyelitis in a predetermined location, *433
Innes, J. R. M., and W. Plowright, focal symmetrical poliomalacia of sheep in Kenya, *185
International congress of neuropathology, 113
Intraspinal teratoma, with report of a case, *214

JENSEN, A. V., see Tarlov, I. M., T108
Jervis, George A., progressive muscular dystrophy with extensive demyelination of the brain, *376

KAUFMAN, Albert A., and Kenneth A. Blinn, the effect of adenosinetriphosphate in nervous anoxia, *387
Kell, Joseph F., Jr., see Harrington, Eileen S., *214
Koelle, George B., cholinesterases of the central nervous system, *23
Kuwabara, Toichiro, see Cogan, David G., *95

LICHTENSTEIN, Ben W., and Ira Gore, Wilson's disease-chronic form (clinical-pathological observations in a brother and sister), T110, D111
Lindenberg, Richard, compression of brain arteries as pathogenetic factor for

tissue necroses and their areas of predilection, *223
Lipotropism in experimental poliomyelitis, T109
Lux, James J., see Sprofkin, Bertram E., *288

McALHANY, Howard J., and Martin G. Netsky, compression of the spinal cord by extramedullary neoplasms, *276
McMenemey, W. H., see Norman, R. M., *84
Meningitis, histoplasma, a case report of, *288
Meningoencephalomyelitis, allergic, in a predetermined location, the induction of the lesions of, *433
Method of replacing portions of the calvarium with transparent plastic, *305
Mettler, Fred A., the experimental anatomophysiologic approach to the study of diseases of the basal ganglia, *115
, Malcolm B. Carpenter, and Raul M. Carrea, stereotaxic displacement of portions of the chorioid plexus in the rhesus monkey, *92

NECROSES, tissue, and their areas of predilection, compression of brain arteries as pathogenetic factor for, *223
Neoplasms, extramedullary, compression of the spinal cord by, *276
Netsky, Martin G., see McAlhany, Howard J., *276
, See Bates, John I., *316
Neumann, Meta A., and Robert Cohn, progressive familial ataxia. clinical study of two brothers with one autopsy, *398
Neuropathology, dynamic, *28
, the role of in modern anthropology. an introduction to the symposium on new techniques, *1
Nervous system, application of quantitative histochemical methods to the study of the, *39
, the phosphatases of the, *11
Norman, R. M., and W. H. McMenemey, transventricular adhesions in association with birth injury of the caudate nucleus, *84

OLIGODENDROGLIOMAS of the brain, cytology and cellular pathology, of the, *142
Oxidases and peroxidases of the central nervous system, *47

PAPILLOMAS, choroid plexus, hydrocephalus associated with, *442
Pathology of poliomyelitis treated in respirator, *297
Perineuronal satellite cells in the motor cortex of aging brains *424
Phosphatases of the nervous system, *11
Phosphorus compounds, quantitation of, in the normal and pathologic human brain, *70
Plowright, W., see Innes, J. R. M., *185
Poliomalacia, focal symmetrical, of sheep in Kenya, *185
Poliomyelitis, pathology of, treated in respirator, *297
Pomerat, C. M., dynamic neuropathology, *28
Pope, Alfred, application of quantitative histochemical methods to the study of the nervous system, *39
Progressive familial ataxia. clinical study of two brothers with one autopsy, *398
muscular dystrophy with extensive demyelination of the brain, *376
Pudenz, Robert H., see Russell, Findlay E., *326

QUANTITATIVE histochemical methods to the study of the nervous system, application of, *39

RAVENS, J. R., L. L. Adamkiewicz, and R. Groff, cytology of the oligodendrogliomas of the brain, *142
Role of mechanical and ischemic factors in causing spinal compression paralysis, T108
Roizin, Leon, oxidases and peroxidases of the central nervous system, *47
Russell, Findlay E., and Robert H. Pudenz, an adaptable head holder for experimental cranial surgery, *326

SARCOIDOSIS, a case of symmetrical muscular contracture due to, *313
Satellite cells, perineuronal, in the motor cortex of aging brains, *424
Scharenberg, K., pathology of poliomyelitis treated in respirator, *297
Schwartzman, Gregory, see Aronson, Stanley M., T109
Seizure patterns induced by electrical stimulation of hippocampal formation in the cat, *198
Settlage, Paul H., see Bogumill, George P., *305
Shapiro, John L., see Sprofkin, Bertram E., *288
Smith, Joseph F., hydrocephalus associated with choroid plexus papillomas, *442
Spinal cord, compression of the, by extramedullary neoplasms, *276
Spongioblastoma multiforme, spontaneous arachnoidal dissemination of, *263
Spontaneous arachnoidal dissemination of spongioblastoma multiforme, *263
Sprofkin, Bertram E., John L. Shapiro, and James J. Lux, histoplasmosis of the central nervous system. a case report of histoplasma meningitis, *288
Status verrucosus of the cerebral cortex, *331
Stellar, Stanley, and Irving S. Cooper, ex-

perimental cerebellopontine angle tumors with angiographic study, *438
Stereotaxic displacement of portions of the chorioid plexus in the rhesus monkey, *92

TARLOV, I. M., S. Gelfan, and A. V. Jensen, the role of mechanical and ischemic factors in causing spinal compression paralysis, T108
Teodoru, Constantin V., see Aronson, Stanley M., T109
Teratoma, intraspinal, with report of a case, *214
Towbin, Abe, and George E. Bell, spontaneous arachnoidal dissemination of spongioblastoma multiforme, *263
Transventricular adhesions in association with birth injury of caudate nucleus, *84

VAN DER HORST, L., application of the field theory to gliomata, *369
Ventricles, lateral, developmental anomalies of the horns of the, *316

WALKER, A. Earl, see Browne, Kenneth M., T108
Warburg, Mette, a case of symmetrical muscular contracture due to sarcoidosis, *313
Warner, Wilbert A., see Browne, Kenneth M., T108
Wolf, Abner, see Feigin, Irwin, *11
Wilson's disease-chronic form (clinicopathological observations in a brother and sister), T110
